**Question: 59**

What condition affects learning and impulse control?

- A. FAS
- B. Down Syndrome
- C. Autism
- D. ADHD

**Answer: D**

Attention deficit hyperactivity disorder affects learning and impulse control. It is related primarily to vision, hearing, language, attention, and touch. It occurs in 5 to 10 percent of elementary school populations and is more common in boys.

**Question: 60**

What conditions display major depression, bipolar disorder, schizophrenia, and obsessive-compulsive disorder?

- A. FAS and Autism
- B. Emotional Disturbance and Mental Illness
- C. Autism, Emotional Disturbance, and Mental Illness
- D. ADHD and Autism

**Answer: B**

Emotional disturbance and mental illness display major depression, bipolar disorder, schizophrenia, and obsessive-compulsive disorder. These conditions are the second leading cause of disability and premature death in the United States.

**Question: 61**

What is NOT a common classification of emotional disturbance and mental illness?

- A. Psychoneuroses
- B. Personality disorders
- C. Psychoses
- D. Repetitive internal dialogue

**Answer: D**

Repetitive internal dialogue is not a common classification of emotional disturbance and mental illness. Psychoneuroses are classified as anxiety, depressive, obsessive, or conversion reactions. Personality disorders are classified as situational or adjustment reactions. A psychosis is classified as schizophrenia.

**Question: 62**

What disease is characterized by intellectual and cognitive disturbance?

- A. Psychoneuroses
- B. Alzheimer's
- C. Psychoses
- D. Seizures

**Answer: B**

Alzheimer's is characterized by intellectual and cognitive disturbance. There are three types: early onset, late onset, and familial. Early onset is diagnosed before the age of 65. Late onset occurs after the age of 65. Familial is entirely inherited, with onset in the early 40s.

**Question: 63**

What condition has symptom of recurrent or chronic brain dysfunction?

- A. Psychoneuroses
- B. Alzheimer's
- C. Psychoses
- D. Seizure disorder

**Answer: D**

Seizure disorder is the condition that has symptoms of recurrent or chronic brain dysfunction. It is characterized by discrete, recurring behavioral manifestations that include disturbances of balance, sensation, behavior, perception, or

consciousness. The manifestations are due to abnormally excessive neuronal discharge.

# SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

*Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:*

**Actual Exam Questions:** *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

**Exam Dumps:** *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

**Practice Tests:** *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

**Guaranteed Success:** *Killexams.com offers a success guarantee with their exam dumps.
